OPERATOR COMMENTS AND SUBMITTAL

Comments

After numerous unsuccessful attempts to get phone contact information for Mr. Cantrell we are permitting this well without the required NOI and SUA. Mr. Cantrall did receive all his documents on 05/15/14. Mr. Timmer, our Landman contacted Diana Cantrall (mother of Scott Cantrall) and left a message requesting a phone # for Scott. Mr. Timmer left another message with Diana Cantrall on May 21st. She then called back and said she would call Scott and see if she could get him to call us. Have not received any calls from Scott Cantrall, nor requested paperwork back from Mr. Cantrall.

Description

	Open hole resistivity and gamma logs shall be run to describe the stratigraphy of the entire well bore and to adequately verify the setting depth of surface casing and aquifer coverage. On a multi-well pad, these open hole logs are only required on one of the first wells drilled on the pad and the Drilling Completion Report - Form 5 for every well on the pad shall identify which well was logged.
	1) Provide 48 hour notice prior to spud via electronic Form 42. 2) Set surface casing to depth proposed. Setting depth must also be least 50' into Pierre Shale. Cement to surface. 3) If completed, provide cement coverage from TD to a minimum of 200' above Niobrara. Verify coverage with cement bond log. 4) If dry hole, set 35 sks cement 50' above Niobrara top, 35 sks cement ½ out, ½ in surface casing, 10 sks cement at top of surface casing, cut casing 4' below GL, weld on plate, 5 sks cement in rat hole & 5 sks cement in mouse hole. 5) Supply mud report showing chlorides, representative of conditions at TD, with Form 5.
