Inspector Comment:

UIC Routine (Annual) inspection did not pass. The casing failed to successfully blow down during the field test. Communication between the casing and tubing was observed during the test. A tubing leak is suspected. Casing integrity cannot be confirmed. See UIC section of this report. This well must remain shut in until a successful MIT is witnessed by COGCC.

Comment: UIC Routine (Annual) inspection did not pass. The casing failed to successfully blow down during the field inspection. Casing blew out oil/ packer fluid then changed to produced water when opened. Communication between the casing and tubing was observed during the test. The tubing pressure fell off from 120 psi to 30 psi during the test. A tubing leak is suspected. Casing continued to blow (water and gas) and pressure up when valve closed. A water/ vac truck was used to contain all released fluids.

Method of Injection: PUMP FEED
