Jacob,

COGCC has reviewed the Subsequent Form 27 and Site Assessment Report submitted by Noble Energy, Inc. on Jul 31, 2014 for the State M 7-36 location, COGCC Remediation Project Number 8495. COGCC agrees with Noble's proposal to excavate additional impacted soil in the upland floodplain area and to install ground water monitoring wells for quarterly ground water monitoring.

COGCC records show that spill tracking #400631216 has not been resolved. Please submit an eForm 19 requesting closure by reference to Remediation Project Number 8495.

Please contact me with any questions regarding this project.

Regards,

Rick Allison, P.G.
