Land Use: \_\_\_\_\_

Comment: Portions of the interim reclamation area are revegetated sufficiently with crested wheat grass and western wheatgrass. However some portions are not revegetated sufficiently and have little vegetative cover. Monitor areas of poor revegetation to determine if re-seeding or other treatments are necessary to achieve 80% revegetation across the interim reclamation area.

The area below is fairly well vegetated so that stormwater flows are adequately filtered and de-energized below the erosion. However, this area needs to be monitored for further erosion and repaired/stabilized if necessary.</div> CA: _____
