To: Elm Ridge-Terry Lindeman-Mgr <tlindeman@elmridge.net>

Elm Ridge Exploration Co., LLC
IGW #152
NWSW 15 33N 9W
05-067-09907
Approved APD Doc #400520864

The approved APD required that the *surface casing* be set at a depth of 587' and Elm Ridge Exploration Co., LLC or ERE, here forward, has reported an actual setting depth of 542' as per the Sundry Notice submitted with doc #3400640213.

I have been given the powers of discretionary judgment in the matter and will not issue an NOAV this time, but do require you to write a letter to me explaining what the reasons were for the mistake and what you will do in the future to ensure it will not happen again.

It is my intent and practice to place a comment in the APD noting my changes made to the casing/cementing table during the APD review and approval process as well as sending an email to the ERE permitting representative.

Thank you for your cooperation...

Mark Weems, P. E.
Regional Engineer - SW Colorado
