H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Engineer	<p>A sundry notice to conduct a Braden Head Test and venting to atmosphere for 30 minutes for the duration of the test is not necessary. That is an accepted standard practice. To save time, please do not submit any more requests like this.</p> <p>If it is desired to vent the Braden head access full time or year around, make that request via form 4 Sundry Notice. After reviewing the most recent tests, the COGCC will make a decision then as to whether or not to approve the request.</p> <p>Remedial work can include full time venting, routing the Braden Head gas to the engine on the pump, or perforating and cement squeezing the intermediate/production casing(s).</p> <p>Thank you...</p>	9/10/2014 2:35:38 PM
