### **Best Management Practices**

#### **No BMP/COA Type**

#### **Description**

1	Planning	Share/consolidate corridors for pipeline ROWs to the maximum extent possible. Minimize the number, length, and footprint of oil and gas development roads. Use existing roads where possible. Combine and share roads to minimize habitat fragmentation.
2	Interim Reclamation	WPX Energy will use certified, weed free grass hay, straw, hay or other mulch materials used for the reseeding and reclamation of disturbed areas. Install exclusionary devices to prevent bird and other wildlife access to equipment stacks, vents and openings. Reduce visits to well-sites through remote monitoring (i.e. SCADA) and the use of multi-function contractors.
