Remarks: This well was drilled in 1983 and was in TA status when AEP purchased it from Rosetta Resources. We have hooked it up to our flowline and consider it a producing well at this time. I left the first production date blank since it was capable of producing but does not have any production showing on COGCC database.

The undersigned certifies that the rules and regulations of the Oil and Gas Conservation Commission of the State of Colorado have been complied with except as noted above and that the transporter(s) is (are) authorized to transport the oil and/or gas produced from the above described well and that this authorization will be valid until further notice to the transporter named herein or until cancelled by the Colorado Oil and Gas Conservation Commission.
