#### COMMENTS:

The Kaiser H-10HC well (123-39601), located in 10-6N-65W is to be drilled and completed by Bayswater Exploration. The estimated frac date is December 1st. The COA lists the Avery 23-10,123-13964, to choose option 1 or 2 for mitigation. It appears this is required due to short surface casing.  
We would like to request the remediation option to be changed to option #4 (set RBP, install 5K wellhead, monitor bradenhead). Our request is due to the large distance between the Avery 23-10 well and the Kaiser H well (1165') and this well already has remedial cement work from 584'-764'.
