RE: Coalview G02-65-1HN COA Exception Request

Dear Mr. Lepore,

Noble Energy Incorporated (NEI) would like to request an exception from the conditions of approval requiring a Resistivity Log be run on this well pad (location 438263). The Dinner 1-14 vertical well (05-123-19003) has open-hole logs from 1995 which includes the Resistivity log. NEI feels it will provide the information regarding stratigraphic and aquifer the COGCC is requesting with this COA.

The log, document #967752 has been included in the sundry (doc#400691755) submitted for this request.

I can be reached at (303) 228-4437 if you have any questions or concerns regarding this request.

Sincerely,

A handwritten signature in black ink that reads 'Cheryl Johnson'.

Cheryl Johnson  
Completions Supervisor
