OGCC scan,

Please upload email below as "project update" to project 8597.

Blair,

Thanks for the update, glad to hear things are moving forward in cleaning and evaluating the tanks.

Kris,

As a status update for the tank cleanout project, POC has cleaned and conducted internal inspection of both tanks 4 and 5. Materials have been ordered for replacement of the tank tops and rings for these two tanks. The cleanout of Tank 1 is on hold due to some issues with cleaning out the transport truck at the disposal facility. Cleanout of tank 1 will resume once resolution between the disposal facility and the transport company can be achieved. Additionally, POC is researching additional disposal facilities to keep tank cleanout activities proceeding. I will keep you updated when POC resumes cleaning out Tank 1.

Please let me know if you have any questions or concerns with the provided information.

Thank you,
