COMMENTS:

Anadarko Reynolds Cattle & Benson Farms offset COA chage request from option 1 to option 4:
We would like to request the COA be changed to our standard Option 4 type remediation be allowed for these wells (pull tubing, set RBP, 5K wellhead, monitor bradenhead). We would like to request this change because:
1) Both of the Benson wells have approximately 570 to 640 feet of cement coverage over the Niobrara formation.
2) The deepest water well within 1 mile of the PDCE Benson wells is only 100 feet deep and surface casing in the Benson wells is set at 435 feet.
3) There are only three recorded water wells within 1 mile of the Benson wells.
4) The Benson wells are located outside of the Fox Hills aquifer area.
