Operator Comments:

Originally, Synergy was going to drill north from section 16 into section 9, however seismic revealed a large fault in Section 16. We would like to utilize the five western shls on the Kiehn pad to drill east to west in Section 9 to develop those minerals. The equipment the was originally approved on the 2A will not change, the layout does change. The five western well locations will move 30' to the south, the tank layout will also change. The tanks will be split in a northern and southern orientation instead of in a line from west to east.

Sundries on the five Kiehn pad will be submitted. A revised mutli-well plan and production facility drawing are attached.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
