Jennifer,

This low TOC is acceptable. WPX can proceed with the completion plan.

Hi Guys,

I emailed Jay this notification and received an out of office reply which says to send it to either of you. Please let me know if you have any questions or I need to do anything further to get this well approved to frac next week and to be pressure tested tomorrow.

Thank you,
Jennifer

Hi Jay,

I believe this is your area, but if it's not just let me know and I will send it to Craig. This email is to notify you that the GM 412-21 on the GM 442-20 pad has a low top of cement. Details of this well include:

GM 412-21 (05-045-22357)- MV Well

- This well is a new drill

- Top of Cement- 4068'
- This well ***does not*** cover 200' above the top of the Mesa Verde (Geology pick: 4061')
- This well ***does*** cover the top of gas (Geology pick: 5358')
- Bradenhead pressure is 0 psi
- The planned top perf depth is 5393'

The well is scheduled to frac on **10/21/2014**. And we were hoping to pressure test the well tomorrow. Please advise.

Thank you,

Jennifer Schrant
