### Description of the well Site and Construction Area.

A 1-3 acre site with access road for drilling of oil and gas well. Terrain is flat with native grass and sagebrush. A shallow surface water depression, which is dry, is located 206' northwest of the well stake. A dirt brim will be installed to protect this area. This area will not be disturbed by drilling operations. Surface Roughening will be used on any low side of drill site to reduce speed of runoff, increase infiltration, reduce erosion, trap sediment and prepare soil for reseeding. Drilling pits will be reclaimed within 6 months weather permitting. Topsoil will be separated and spread on drill site as final operation before reseeding operations. To prevent soil erosion site will be disked and straw crimped in or manure spread.
