Shauna,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

1) In the Land Use section you have indicated the Current Land Use is Irrigated Cropland while the Future Land Use is Industrial. This future industrial land use seems odd given the agricultural nature of land use in the vicinity of this proposed oil and gas location. What information do you have indicates the future land use for this location will be industrial?

2) A review of the Hydrology Map indicates the nearest water well is Permit #228954 located 929 feet northeast. Therefore I would like to change this distance from 1,142 feet to 929 feet in the Water Resources section.

Please respond to this correspondence by November 17, 2014. If you have any questions, please contact me. Thank you.

Subject: COGCC Form 2A review of Verdad's DRAKE 01N-65W-22 location - Doc #400700695

Shauna,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

1) In the Land Use section you have indicated the Current Land Use is Irrigated Cropland while the Future Land Use is Industrial. This future industrial land use seems odd given the agricultural nature of land use in the vicinity of this proposed oil and gas location. What information do you have indicates the future land use for this location will be industrial?

I believe this must have been an error on the Form 2A. The future industrial use will not change from the current land use. Can you update the future land use to be "irrigated cropland"?

2) A review of the Hydrology Map indicates the nearest water well is Permit #228954 located 929 feet northeast. Therefore I would like to change this distance from 1,142 feet to 929 feet in the Water Resources section.

I apologize for the confusion on this. I agree that the distance to nearest water well needs to be updated to 929' per the hydrology map.

Please respond to this correspondence by November 17, 2014. If you have any questions, please contact me. Thank you.
