

Photo 1. Birdseye view of vegetation within the well pad area. Vegetation is mainly comprised of the native plant-Indian ricegrass (*Achnatherum hymenoides*) and several small rosettes of the noxious weed-musk thistle (*Carduus nutans*).

Photo 2. View of revegetation within the project area. Tall brown plants extending above the grassy vegetation in the mid-ground are the noxious weed musk thistle.

Photo 3. View of large-woody debris pile along the eastern edge of the project area.

Photo 4. View of culvert pipe in northeastern corner of project area.

Photo 5. View of culvert pipe in northwestern corner of project area.

Photo 6. View of two-track leading to well pad that needs to be revegetated.

Photo 7. View of the beginning of "Vegetation Transect 1" located within the project area.

Photo 8. View of the beginning of "Vegetation Transect 2", outside of the project area.
