All,

Please see the notes below. Doug and I also discussed that on the Location Drawing for the Faith location, Noble will need to label the Qrt/Qrt lines due to the surveyor having this detail on the plat.

Please print a copy of this correspondence and attach it with the Faith LC34-785 Permit Package. This will allow other internal Noble departments know that we have direction and clarification on this location from the COGCC.

Thanks,

Kate

Subject: Faith LC34-785 COGCC Question

Good Morning Doug,

Thank you again for your time on Friday to discuss Noble's proposed location, Faith LC34-785. Per our conversation, Noble would like to respectfully request that our new location Faith LC34-785 and our existing location Castor LC34-68HN (Location ID 422926) be considered as separate locations due to business economics. The Landman has confirmed that the only overlap that will take place between the two locations will be the perimeter fencing. In addition, once Interim reclamation has commenced, the disturbances will be separate in the field.

I have also recorded notes, that Noble will need to review the approved Castor LC34-68HN (Location ID 422926) permit to make sure that our cultural distances, hydrology, and soils are similar to our new project. Any significant differences will need to be explained with our new Form 2A.

Please let me know if you see any additions or revisions with these notes.

Best Regards,

Kate

This is an old EOG permit that was originally named: 1870 Creek #26-34H

Subject: Faith LC34-785 COGCC Question

Good Morning Doug,

I have a question with Location ID 422926 (Castor LC34-68HN). This project is located NW/4NW/4 of Section 34, T9N, R59W. Please see the attached Location Drawing that details our proposed disturbance area for our Faith LC34-785 project.

Would you have time to discuss a couple of questions that the Landman and I have with this project?
