As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Potentially contaminated soil was observed during reclamation of the abandoned well site. Koch Exploration Company, LLC (KEC) hasn't produced any liquids from the well since the site was acquired from Encana in 2010. KEC is unaware of any historical resources. Upon discovery of the potentially contaminated soil, KEC stopped site reclamation work. Preliminary delineation efforts indicated an impacted area of approximately 70' x 70' x 40'. KEC will excavate the impacted soil and conduct confirmation sampling of the excavated area. Impacted soil will either be landfarmed on site or disposed at a licensed disposal facility.
