REM#8579
 The approved Form 27 proposed that samples be collected for TPHGRO/DRO/ORO, BTEX, RCRA 8 Metals, pH, SAR, and EC from untreated stockpiles, treated stockpiles, pit walls and pit floor. Whiting requests that pH, SAR, and EC samples be collected from only the upper three feet (root zone) of material that is removed from each pit. The upper three feet of material is primarily topsoil that was used to cap the impacted material in the pits and will be removed, stockpiled and replaced at the surface of the pit.
