|---|--------------------------------|--|
| 1 | General Housekeeping | Materials and fluids will be stored neat and orderly. Wastes will be temporarily stored in sealed containers and regularly collected and disposed of at offsite, suitable facilities. Prompt cleanup of spills will be required to minimize any commingling of waste materials with stormwater runoff. Routine maintenance will be limited to fueling and lubrication of equipment. Drip pans will be used during routine fueling and maintenance to contain spills or leaks. Any waste product from maintenance will be containerized and transported offsite for disposal or recycling. There will be no major equipment overhauls conducted onsite. Cleanup will consist of patrolling the roadways, access areas, and other work areas to pick up trash, scrap debris, other discarded materials, and any contaminated soil. These materials will be disposed of properly. |
| 2 | Dust control | Aus-Tex will apply appropriate measures to ensure dust control and mitigate potential impacts resulting from dust emissions. |
| 3 | Drilling/Completion Operations | Aus-Tex will ensure compliance with Rule 318e (Wells located near a mine). |
