Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On October 29, 2014, a historical release was discovered while replacing the produced water sump at the Kugel W 4-3, 4-6 production facility. Approximately 400 cubic yards of impacted soil have been removed and transported to the Kerr-McGee land treatment facility in Weld County, Colorado. The current excavation area is approximately 30 feet x 30 feet with an approximate depth of 5 feet below ground surface (bgs). Points of compliance have been established on the west and southwest sidewalls of the excavation area. Excavation activities are on-going at this location.
