COMMENTS:

Caerus Piceance LLC is submitting this Sundry Form 4 requesting approval to transport impacted soil from the Chevron 1B-8D to the Caerus Chevron 31B-7D (facility ID 335652) and Garden Gulch Compressor Station (Facility ID 417558) to conduct ex-situ remediation of impacted soils. This request is being submitted due to the lack of space on the Chevron 1B-8D well pad to successfully conduct ex-situ treatment of the impacted soil.

The impacted material is a result of a historic release discovered during the removal of a partially buried produced water tank (spill/release tracking #2148555). The impacted soil will be transported to the above listed locations, placed into land treatment units, and remediated ex-situ to below COGCC Table 910-1 standards. Remediation plans have been approved under the Form 27 Remediation Work plan #8164.

Upon receiving approval of this Form 4 request, Caerus will transport the impacted material to the Chevron 31B-7D well pad and Garden Gulch Compressor Station and begin treatment.
