OXY is proposing to re-enter and re-complete the 697-09-54B well which is located on the 697-09-61 pad (location #335889). The 697-09-61 pad is an existing pad with 16 producing wells, 4 plugged and abandoned wells and the 697-09-54B well which is shut in. There will be no additional surface disturbance to the pad. OXY will temporarily plug off and isolate the Williams Fork formation by setting a CIBP within 50' of the top perf. The Wasatch formation will be perf'd and tubing will be set. Green completions will be utilized. Per my conversation with Arthur Koepsell on 10/14/2014, no baseline water sampling is required on a re-entry procedure.
