Angie,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

- 1) The Construction Layout Plan drawing depicts 4 heater treaters yet in the Facilities section you do not list any heater treaters. Please confirm the number of heater treaters that will be on this proposed oil and gas location.
- 2) Because you have indicated there will be a freshwater storage pit on this location, I will also check 1 Multi-Well Pit in the Facilities section.
- 3) You have indicated the nearest downgradient surface water feature is 1,000 feet from this proposed oil and gas location. Your Hydrology Map indicates there are no surface water features within 1,000 feet. During my review it appears there are no downgradient surface water features within one mile of this proposed oil and gas location. Therefore, I would like to change this distance in the Water Resources section to 5,280 feet. On future Form 2A submittals please indicate the distance to the nearest downgradient surface water feature to at least one mile.
- 4) Because the Land Use for this proposed oil and gas location is Dryland Crop Land, the Plant Community section does not need to be completed and the Reference Area Map and Pictures attachments are not required. Therefore, I will remove them from this Form 2A.

Please respond to this correspondence by December 6, 2014. If you have any questions, please contact me. Thank you.

Doug,

- 1) Please note the 4 heater treaters under the facilities.
- 2) Thank you for checking the multi-well pit.
- 3) Please make the change to 5,280 feet. I will be sure to indicate the nearest surface water distance to a mile.
- 4) Thank you for removing these items from the Form 2A.

Please let me know if anything in addition is required.

Thank you,
Angie
