### OPERATOR COMMENTS AND SUBMITTAL

Comments This pad sits on Federal surface and below the pad is Federal minerals. 10 of the 12 permit applications drill into the federal minerals below the pad. 2 location drill to the SW into fee minerals, thus on these permits I have attached the fee mineral lease and was not required to file a Federal Permit.

Under BLM rules WPX does not file a Federal Permit but must obtain a right-of-way to access these two locations from the pad. This right-of-way request was applied for in the submitted SUPO to BLM.

This application is in a Comprehensive Drilling Plan \_\_\_\_\_ CDP #: \_\_\_\_\_

Location ID: 335235

Is this application being submitted with an Oil and Gas Location Assessment application? Yes

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

Permit	Clicked box for directional and notified Opr. No anti-collision has been provided for this well or the 444-34, but comparing the Dev. Drilling Plan they are over 100' apart. Final review complete.	11/5/2014 11:18:33 AM
Engineer	Evaluated existing offset wells within 1,500 feet of this wellbore. Offset wells target the MVRD formation. No mitigation required. The proposed surface casing is more than 50' below the depth of the deepest water well within 1-mile of the surface location when corrected for elevation differences. The deepest water well within 1-mile is set at an elevation of 5205' above sea level.	9/2/2014 11:34:37 AM
