Form 2A COAs:

Group	User	Comment	Date
OGLA	walkerv	Location is in a sensitive area because of shallow groundwater; therefore, either a lined drilling pit or closed loop system is required	08/24/2010
OGLA	walkerv	Surface disturbance shall not encroach on the ditch located 122 feet to the north shown as B on the location drawing	08/24/2010
OGLA	walkerv	Operator must implement best management practices including, but not limited to, construction of a berm or diversion dike, site grading, or other comparable measures sufficiently protective of the ditch located 122 feet to the north shown as B on the location drawing to prevent impact by any unintentional release of drilling, completion, or produced fluids	08/24/2010
DOW	greenmanc	No surface occupancy or construction within 0.25 mile of any active bald eagle winter night roost site, where there is no direct line of sight to the roost, between December 1 and February 28 and within 0.5 mile of any active bald eagle winter night roost site, where there is a direct line of sight to the roost, between December 1 and February 28. •Within 0.5 mile of any active bald eagle winter roost site from November 15 to March 15, periodic visits such as maintenance and monitoring should be restricted to the period between 10:00 a.m. and 2:00 p.m.Minor workover or swabbing to improve production that could be completed within a 2-day time frame would be allowed. •If a closed loop system is not used, the reserve pit must be sucked dry immediately following drilling and completion activities, or the pit must be netted until fluids evaporate and the pit solids are reclaimed.After drilling and completion, all produced fluids will be contained in tanks.	08/25/2010
