This form is being filed as a refile on a location that had no previous 2A. The eleven wells assigned to the location were Sundried as AL's and are being moved approximately 150' West, with the location, as refiles. The pad has not been built. The wells were not drilled.

Distance to nearest well completed in the same formation / permitted or existing well penetrating objective formation was measured to the proposed Puckett 14C-1. The distance to lease line was measured from the BHL to the SW corner of the Puckett 5,141 acre lease in Section 1. Please see the BMPs attached to the Form 2A Location Assessment for this well pad (Doc # 400703256). Please note: this well is located near the abandoned PUCKETT-67S97W 2SESE Pad (Location # 335017). The Puckett pad was not constructed.

Permit	Added comment to Opr comments regarding changing this form to a refile in order to move an old location approximately 150' west along with 11 wells that were previously AL. This will now be one of the eleven AL wells moved. Added location ID and API number as per opr. Final review complete.	11/11/2014 3:37:41 PM
Engineer	Evaluated existing offset wells within 1,500 feet of this wellbore. Offset wells target the MVRD formation. No mitigation required. The proposed surface casing is more than 50' below the depth of the deepest water well within 1-mile of the surface location when corrected for elevation differences. There are no water wells used for non-industrial purposes within a 1-mile radius of the surface location.	11/3/2014 2:23:20 PM
