Operator Comments:

In response to Inspection No. 674700428, and in lieu of the requested Form 42, Encana Oil & Gas (USA) Inc. states that the pit permit was originally permitted by ConocoPhillips in 2009. On this permit, the pit was associated with a well on location (N. Parachute CP11A-05 A05 595, API # 05-045-14532). On June 13, 2011, Encana filed a Form 10 Certification of Clearance and/or Change of Operator for the above-referenced well. This Form 10 transferred the well to Encana's name. Given the association of the pit permit and this well, along with the COGCC's scout card which shows Encana as the current operator for this pit, Encana believes that the pit has been successfully transferred to Encana's name. Attached is the current COGCC scout card which shows that the pit is currently listed under Encana's name. We are also attaching the Form 10 for your reference, and have listed the original pit permit as a related form to this Sundry. Additionally, Encana has been in communication with Alex Fisher, West Environmental Supervisor with the COGCC, regarding the pit permit and will continue to work with COGCC staff to address pit permit issues.

On October 29, 2014, Encana drew down the water in the pit in order to inspect the pit liner. The liner was found to be in good condition with no damage to liner. The floating liner in question is a flap that was previously installed to accommodate a fill manifold in the pit. This flap was originally installed over the fill manifold in order to reduce harm to liner during pit fill operations. This fill manifold has since been removed. The liner beneath the flap is intact.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
