Callie,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

1) A review of your Location Drawing indicates this proposed oil and gas location will include the existing Great Western 26-24 well (Location ID #306149). Therefore, I would like to update the Facilities list from 14 wells to 15 wells and change this 2A from a New Location to Amend Existing Location #306149.

2) A review of your Location Drawing indicates the distance from the nearest well to the nearest Above Ground Utility is 780 feet (Line L19). Therefore, I would like to change this distance in the Cultural Distance section.

Please respond to this correspondence by December 19, 2014. If you have any questions, please contact me. Thank you.

Hi Doug,

The changes you listed in 1 sound good but the reason the location drawing indicates a different distance than the cultural distances is because the distance on the location drawing is taken from the slot 26-B well (north easterly most well). On the location identification tab I have indicated I'm referencing the 25-202HC well (second most north westerly well).

Thank you,

Callie Fiddes

Callie,

While you are correct that your Location Drawing shows that distance is from your 26-B slot which you are currently not permitting a well for, a review of the Form 2 APD for your 27-382HN well (southeasterly most well) indicates the distance to the nearest Above Ground Utility is 781 feet. Therefore I would like to instead change this distance to 781 feet.

Also, further review of this well's Form 2 APD indicates the distance to the nearest Property Line is 595 feet. However, on the Form 2A you have indicated the distance from a well to the nearest Property Line is 775 feet. Therefore I would also like to change that distance on the Form 2A to 595 feet.

Doug,

I'm not understanding why this needs to be changed when it's clear that those distances are from the 25-202HC well. It's always been ok to just pick a reference well. It doesn't say anywhere on the 2A to pick the well that is closest to those features.

Callie,

The instructions for the Cultural Distance section on the Form 2A clearly states "All measurements shall be provided from center of **nearest Well** or edge of **nearest Production Facility** to nearest of each cultural feature. This has always been the case from day one. I'm not asking to change your Location Drawing, just the distances in the Cultural Section. Given this requirement I would like to change these two distances in the Cultural Distance section of the 2A.

Ok, I will start doing that. I was under the impression that just meant for the referenced well that I was listing under the location identification tab. And yes, I'd like to change those distances you mentioned please.

Thank you,

Callie Fiddes
