Comment: It does not appear that areas no longer needed for use have been reclaimed for interim reclamation. There are large areas on the well pad with no facilities or well that need to be reclaimed. A large area in the northeastern portion of the project area appears to have been reclaimed. Vegetation here is primarily Russian thistle (Salsola tragus). See attached photos for additional detail.

COGCC Comments

Comment	User	Date
Location does not meet reclamation regulations. Submit a detailed plan describing reclamation of the unused areas in the project area and northeastern reclamation area that is currently infested with Russian thistle by January 31, 2015. The plan should include a minimum of a detailed schedule for reclamation activities, weed management plan, stormwater management during and after reclamation activities, fertilizer/soil amendments, seed mixture, seed application method, mulch type, water (if needed). Revegetation activities should be conducted no later than the spring 2015 growing season.	RoyC	11/22/2014
