Keith,

I have completed my review of these two referenced Form 2A Oil & Gas Location Assessments and have the following comments.

1) For both of these proposed locations you have selected a Reference Area whose Latitude and Longitude appear to place it within the disturbed area of the MLVT Pad. The Lat. & Long. for your Reference Area is 40.565288 North / 104.318481 West. The Lat. & Long. for the reference point of the MLVT Pad is 40.565215 North / 104.318633 West. These two points are only approximately 50 feet apart. From your Location Drawing, the Reference Point appears to be the center of the MLVT Pad disturbance area. Per the COGCC definition of Reference Area it shall be an area that is undisturbed by oil and gas operations. Please provide me a new Reference Area Map for both of these proposed locations that will be in an area undisturbed by oil and gas operations.

2) For the Cultural Distances on the Crow Valley V-21 MLVT Pad 2A, you have indicated the distance to the nearest Public Road is 325 feet. From your Location Drawing this appears to be the distance from the Reference Point. All other distances listed in the Cultural Distance section are taken from the closest edge of this MLVT Pad location. To be consistent, I would like to change the distance to the nearest Public Road to 72 feet as that is the distance shown on your Location Drawing from the closest edge of the location.

Please respond to this correspondence by December 25, 2014. If you have any questions, please contact me. Thank you.

Doug,

I agree to the change in distance to nearest public road.

Can I commit to getting you a new reference area and photos in the growing season?

Thanks,

Keith

Doug,

The attached Reference Area Map and Photos will apply to both Crow Valley V-21 Pad (Doc 400723929) and Crow Valley V-21 MLVT Pad (Doc 400728928) and will not be disturbed by the construction of either.

I agreed to the proposed changes in an earlier email response.

Thanks for your cooperation.
