Best Management Practices

No	BMP/COA Type	Description
1	Construction	<p>At this location, the following construction best management practices will apply:</p> <ul style="list-style-type: none"> • Wattles • Topsoil Windrows (Diversion & ROPs) • Phased Construction • Run-on Protection • Erosion Control Mulch • Seeding • Stabilized unpaved surface • Rip Rap/ECB • Use multiple gathering lines placed in a single trench to minimize disturbance and construction, where appropriate, economically and technically feasible. • Install pipeline crossings at right angles to the drainages, wetlands, and perennial water bodies, where appropriate, economically and technically feasible. • Maintain a minimum of five feet of soil cover between
2	Wildlife	<ul style="list-style-type: none"> • Perform biological surveys (on-site) for each new development, using the most recent data sets for wildlife and wetland resources. • Perform pre-disturbance surveys when the on-site inspection and commencement of disturbance occur in different field seasons using the most recent data sets for wildlife and wetland resources. • Utilize the Encana Wildlife Resources Matrix to identify and document (where appropriate) potential impacts or concerns during the project planning phase for proposed drilling operations and construction of roads, pads and pipelines. • Minimize the number, length and footprint of oil & gas development roads • Use existing access routes where possible • Combine utility infrastructure planning (gas, electric & water) when possible with roadway planning to avoid separate utility corridors • Reduce visits to well-sites through remote monitoring when practical (i.e. SCADA). Maximize use of state-of-the-art drilling technology (e.g., high efficiency rigs, coiled tubing)
3	General Housekeeping	<ul style="list-style-type: none"> • Prohibit Encana employees and contractors from carrying projectile weapons on Encana property, except during company organized events. • Prohibit pets on Encana property. • Strategically apply fugitive dust control measures, including enforce established speed limits on Encana private roads, to reduce fugitive dust and coating of vegetation and deposition in water sources.
