I just spoke to Jack. Peter had just called him as well. Jack said they just did a workover on the well and had an air unit on it venting. He's having the pumper go up there now to go ahead and send the well to sales and the oxygen will have to get knocked out at the compressor station.

Merry Christmas,

Peter there is a large volume of something ( non-liquid) spewing from the well casing of the Parachute 34-25 , 071-08408. There is much concern for safety of man, beast and environment.

D. A. Valentine
