Mr. Allison,

Additional excavation and disposal activities were conducted in the area of CS-4 after the confirmation samples indicated that residual TPH concentrations were above 500 ppm. Approximately, 35 yards³ were excavated and disposed from this area. Waste manifests # 098879 and 098882 are from the disposal of these additional excavated soils. If you need any additional information, please do not hesitate to contact me. Thank you!

Kyle

Was additional soil excavated between the time confirmation sample CS-4 was collected and when HT-07-0611M was collected?

Please confirm the sequence of events and how the soil around CS-4 was evaluated and remediated.

Thank you

Rick
