### **Best Management Practices**

**No BMP/COA Type**

**Description**

Operator Comments:

An MIT test failed on January 7th, 2015. Robert L. Bayless, Producer LLC requests 60 days to mitigate sources of the failure. All perforated hydrocarbon zones are isolated from the casing by a packer, tubing and downhole valve. The plan for mitigation includes removal of the packer, tubing and isolation of the casing using a bridge plug. A new MIT will be conducted. If casing does not pass the test Robert L. Bayless, Producer LLC request 60 additional days to repair or file Form 6 to PA well. All Hydrocarbon producing zones will remain isolated from casing during this time period. Time frame is required to contract services and to avoid any weather issues related to the winter season and remote location of the well.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
