Comment: Deep ruts at the entrance to the well pad where water is ponding. It appears that vehicles have been driving into the interim reclamation area to avoid getting stuck in the ruts. Additionally this is likely causing significant track out.

CA: Ruts and ponding need to be repaired at the entrance to the well pad to prevent track out and further damage to the interim reclamation area.

Pits: ☒ NO SURFACE INDICATION OF PIT

COGCC Comments

Comment	User	Date
Location does not meet reclamation regulations. Kochia debris needs to be removed and ruts need to be repaired by February 28, 2015. Weeds need to be controlled at the appropriate time but no later than seedhead maturity in 2015. Additionally, vegetation in weedy areas and southern fill slope needs to be evaluated in the spring and re-seeded no later than 2015 growing season if necessary.	RoyC	01/16/2015
