OTHER CHANGES

☐ **REMOVE FROM SURFACE BOND** Signed surface use agreement is a required attachment

☒ **CHANGE OF WELL, FACILITY OR OIL & GAS LOCATION NAME OR NUMBER**

From: Name NVEGA-69S93W Number 23NE/SW Effective Date: 01/12/2015
To: Name NVega Number 4A

☐ **ABANDON PERMIT: Permit can only be abandoned if the permitted operation has NOT been conducted. Field inspection will be conducted to verify site status.**

- ☐ WELL: Abandon Application for Permit-to-Drill (Form2) – Well API Number _____ has not been drilled.
- ☐ PIT: Abandon Earthen Pit Permit (Form 15) – COGCC Pit Facility ID Number _____ has not been constructed (Permitted and constructed pit requires closure per Rule 905)
- ☐ CENTRALIZED E&P WASTE MANAGEMENT FACILITY: Abandon Centralized E&P Waste Management Facility Permit (Form 28) – Facility ID Number _____ has not been constructed (Constructed facility requires closure per Rule 908)
- OIL & GAS LOCATION ID Number: _____
- ☐ Abandon Oil & Gas Location Assessment (Form 2A) – Location has not been constructed and site will not be used in the future.
- ☐ Keep Oil & Gas Location Assessment (Form 2A) active until expiration date. This site will be used in the future.

Surface disturbance from Oil and Gas Operations must be reclaimed per Rule 1003 and Rule 1004.

☐ **REQUEST FOR CONFIDENTIAL STATUS**

☐ **DIGITAL WELL LOG UPLOAD**

☐ **DOCUMENTS SUBMITTED** Purpose of Submission: _____

RECLAMATION

INTERIM RECLAMATION

- ☐ Interim Reclamation will commence approximately _____
Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.
- ☐ Interim reclamation complete, site ready for inspection.
Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

- ☐ Final Reclamation will commence approximately _____
Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.
- ☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

Comments:

ENGINEERING AND ENVIRONMENTAL WORK

☐ NOTICE OF CONTINUED TEMPORARILY ABANDONED STATUS

Indicate why the well is temporarily abandoned and describe future plans for utilization in the COMMENTS box below or provide as an attachment, as required by Rule 319.b.(3).

Date well temporarily abandoned _____ Has Production Equipment been removed from site? _____

Mechanical Integrity Test (MIT) required if shut in longer than 2 years. Date of last MIT _____

☐ SPUD DATE: _____

TECHNICAL ENGINEERING AND ENVIRONMENTAL WORK

Details of work must be described in full in the COMMENTS below or provided as an attachment.

☒ NOTICE OF INTENT Approximate Start Date 03/01/2015

☐ REPORT OF WORK DONE Date Work Completed _____

COMMENTS:

Piceance intends to use the NVega 4A pad to stage ~sixty-five 500 bbls "frac" tanks to store produced and freshwater during completion operations for 8 wells to be completed on the Sup & Shep 25-11 pad (334440) in the spring of 2015. The tanks will be tied into the existing buried water infrastructure and temporary surface line to allow for movement of water to the location. The existing spill containment berm around the location will be inspected and upgraded if required to manage in spills that might occur on the location. A sump at the low end of the pad will be installed to allow for pumpng any spill or stormwater from the site. Any fluids pumped will be placed back in to the tanks.
No more than 12 tanks (6000 bbls) will be open to the manifold at any one time. As these tanks are strictly mechanical devices and all valves must be manually operated, personell will be onsite during all operations in which the tanks will be transferring or receiving water.
An emergency spill response trailer will be stage at this location and will be available at all times in case of an emergency.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public

General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Environmental	The COGCC agrees with the statement: "The existing spill containment berm around the location will be inspected and upgraded if required, to manage in spills that might occur on the location." COGCC strongly recommends that the berms around the frac tanks be upgraded as well, so that any release from the tanks can be contained within the frac tanks berms. The berms around the pad should be the last resource to contain any accidental spill/release, not the only one.	1/20/2015 3:22:18 PM
Routing Review	Routed to D. Kubeczko and C. Lujan for review.	1/12/2015 1:10:13 PM
