Ruth,

Thank you for your prompt written reply. Your response satisfies the Warning Letter corrective action requirements. I will provide a formal response to close this enforcement matter by the end of the week.

I do not see an electronic record in COGCC's system of the 8/7/2013 Sundry Notice, but the copy will remain attached to this Warning Letter response. Note that the Sundry Notice "request" was submitted after-the-fact. According to the Form 5 Drilling Completion Report for this well, production casing was set on 7/26/2013, and a pre-remediation CBL was run on 8/5/2013. Significant casing and cement changes require prior approval. Please refer to the attached policy for a general guide.

I will be calling shortly.

Thanks,

Dave
