Comment:

Converted tons of co2 to scf by using 19.25 scf as a universal number in the Total gas used (mcf) box under the formation section. Not online. Waiting on ROW agreements to be finalized. Plan to have online Spring 2015. Tons of CO2 is not on the summary report, and the data came from the frac company.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
