

**Geologist Information**  
 General: Existing Location, 1 existing well (1 new well)  
 Ownership: Clough Surface/Fee Minerals  
 SUA Status: Have SUA  
 Spacing Units: 1 spacing unit  
 Adjacent Owners: Heath, Savage

**Plan of Development**  
 Access: Existing Access  
 Drilling: X Rig  
 Cuttings: In trench along north edge of pad.  
 SIMOPS: No  
 Completions: Frac on pad after rig leaves. 2-10" temporary surface poly lines will run from existing infrastructure near the RMV 232-28 pad. Will need a new can.  
 Flowback: On pad.  
 Production: Separators will be in a 120' x 45' area along the east edge of pad. Tanks will be in a 60' x 40' area along the southeast edge of pad near the access road.  
 Pipeline: Existing 8" gas that runs through the pad will be re-routed along the road around the pad. A new 8" will run from the separators and tie into the re-routed 8".

- Legend**
- Proposed Production Equipment Area
  - Proposed Daylight Line
  - Proposed Pad or Pit
  - Existing Road
  - Existing Pad
  - Proposed Frac Water Supply Line (Temp, Surface)
  - Existing Water Pipeline
