Comment: It does not appear that areas no longer needed for use have been reclaimed for interim reclamation. There are large areas on the well pad with no facilities or well that need to be reclaimed. Areas with vegetation are largely comprised of weeds such as Russian thistle and kochia. Submit a plan by February 28, 2015 to reclaim unused areas and revegetate weedy areas on the well pad and in the interim reclamation area. See below for details.

COGCC Comments

Comment	User	Date
Location does not meet reclamation regulations. Russian thistle debris needs to be removed by February 28, 2015. In addition, submit a plan by February 28, 2015 to revegetate the unused portions of the project area. The plan should contain a detailed schedule for reclamation activities, methods for decompaction, stormwater controls until vegetation is established, weed management, fertilizer/soil amendments, mulch type, seed mixture, and seed application method. Revegetation activities should begin no later than spring 2015.	RoyC	01/29/2015
