Form 2A COAs:

Group	User	Comment	Date
Agency	walkerv	•Location fill is on steep slopes; therefore the slope should be constructed in such a manner to manage site drainage and slope stability. The slope vegetation should be established immediately after the slope has been constructed	04/20/2010
Agency	walkerv	•Reserve pit must be lined before use for drilling or completion activities or closed loop drilling system must be used	04/20/2010
Agency	walkerv	•Operator must ensure 110 percent secondary containment for any volume of fluids contained at well site during drilling/completion/production operations	04/20/2010
Agency	walkerv	•Operator must ensure that BMP are installed to prevent stormwater run-on to and run-off from the site and to prevent stormwater discharge to surface water. Those BMPS must be in place and inspected and deemed adequate before drilling operations can commence. Notify the Southeastern Environmental Protection Specialist, Peter Gintautas – 719-846-3091, a minimum of 48 hours before drilling operations are to commence so that an inspection of the site can be performed to assess the adequacy of the stormwater management practices	04/20/2010
