

Equipment List

Mesa E1-797 Pad

DRILLING

- 1 Drilling Rig and auxiliary equipment to directly support drilling (Mud, water, diesel tanks)
- 3 x Site offices and auxiliary equipment to directly support accommodation
- Generator-set, Sewage Tank, Potable water tank
- Sub-Surface waterlines 2 x 12"

COMPLETIONS

- 75 Temporary Tanks for well stimulation
- Temporary flowback equipment for green completions
- Temporary Flare Stack Equipment

PRODUCTION

- 20 Wellheads with production manifolds
- 2 Condensate full production Tanks (with oil heaters)
- 10 Produced Water full production Tanks
- Sub surface flow-lines from well head to separators and from separators to water and oil tanks
- Primary and tertiary containment
- Antenna, solar panels and telemetry communications and control instrumentation
- 7 Separators
- 3 Chemical Injection Tanks
- 1 Gas Pipeline
- 0 Oil Pipeline
- 1 Water Pipeline with water meter
- 2 VOC Combustors
- 1 Injection Skid
- Produced water transporting manifold and water lines
- Chemical/Soap Injection Facilities for wells
