Tony:

Almost any request to repair a well, as in this case, is a good idea and the COGCC is in agreement. Waiting on the "subsequent paperwork" and, hopefully, a report of this repair achieving the desired results.

Jay,

We are in the process of locating a casing leak in 5-1/2" production casing with a packer/plug combo, and WPX is requesting a Verbal to proceed on the repair, in order to facilitate planning. More info to follow (leaking interval, injection rate and proposed amount of cement to squeeze), probably tonite or in morning.

Should this meet your approval all necessary paperwork will be submitted.

Exploration and Production Casing Repair

Wellname **GV 21-35**
