COMMENTS:

Whiting would like to collect geologic data in the form of open hole logs and sidewall core samples in this vertical well prior to its required mitigation due to the DJ Basin Horizontal Offset Well Policy. After drill/clean out of the wellbore we intend to run a triple combo log. After that is complete, we intend to run in with a rotary sidewall core tool and collect samples in the following 15 depth intervals: 6503-6307, 6323-6332, 6289-6296, 6097-6104, 6054-6058, 6024-6028, 6007-6012, 5967-5971, 5920-5926, 5890-5898, 5849-5858, 5793-5797, 5768-5776, 5691-5699, 5593-5599. Following the collect of logs and core samples we will continue with the mitigation of the well (submitted a Form 6 - Intent to Abandon on 02/17/15).

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
