Compliance Summary:

QtrQtr: _____ Sec: _____ Twp: _____ Range: _____

Inspector Comment:

COGCC staff on location (Kris Neidel, Alex Fischer) with Chevron staff, Tammie Crossen to inspect the Chevron central E&P facility, landfarm. The location was fenced, proper stormwater BMP's in place to prevent run off/on from (to) facility. Location was divided into "pods" that were actively being managed by Chevron. No free product was observable; no pooling of liquid was observable. It was discovered that 3 ground water monitoring well were installed at the facility and that there was, historically no ground water detected in the wells, COGCC suggested that if no ground water was present, the wells should be PA to prevent them being a conduit to the subsurface.
