Meridian: 6

Complaint Issues

<u>Category</u>	<u>Assigned to</u>	<u>Description</u>
NOISE	Jim Precup	<p>We are located at 36590 CR 43, Eaton, CO. We are approximatley 800 feet, south east of the well site. I have attached pictures that were taken from our driveway. These show that there is absolutely no sound wall in the direction of our home. In addition, our bedroom is on the northwest side of our home.</p> <p>We are extremely concerned about the noise level when they begin to drill. Last night, our sleep was disturbed by just the motors of the machines that they have going now. The drilling has not even begun. In addition, this project will be going for most of the summer, if not all of it. We sleep with our windows open in the summer, for many reasons, primarily to keep our electric bill managable. Even with improved sound walls this will not be possible. I shutter to think what our electric bills will be this summer.</p> <p>We thank you in advance for any help that you can provide to expedite improved sound walls and anything else that can be done to minimize the impact this site will have on us throughout this drilling process.</p>
