COA Type

Description

	Provide means to determine if free product (hydrocarbons and/visible sheen) is on the shallow groundwater surface. Based on the measured depth to groundwater and monitoring well construction details, it appears that the top of the monitoring well screen intervals are below the water table surface by approximately two-feet +/- . This will not allow for determining the depth to product (DTP) including visible sheens if present. Refer to Remediation Number, (REM 7716) on future correspondence and submittals.
