Subject: Baseline Exception Requests on Hold
Attachments: NCLP AA06-69HNC_Water wells.pdf; Reliance E23-79HN_Water wells.pdf

Arthur,

Julie and I were going through eforms and noticed that we have four sundries on hold for baseline exception requests. Please see our comments below and let me know if you need anything else from us to approve these requests.

400626980 Reliance E 23-79HN- Noble sent samples on 4/21 (to the 10 closest water wells) we received access on 4/29. Due to scheduling with the landowner we were unable to sample the well until after the first well was spud. Dinner 9065659 sampled on 6/11/2014, first well spud 5/18/2014. Since Noble received access to sample well(s) we did not send additional access letter request. Attached is Noble's Documentation of access letter request.

400605277 Storis E24-76-1HN This is a duplicate sundry request. The exception request was approved on 7/28. Please delete this form.

400627104 NCLP AA07-69HNA- Comment on Sundry: "A review of data on the COGCC website indicates that there are no potentially available water sources, other than those addressed by the operator, within the governmental quarter section of the proposed oil and gas well or within any unsampled governmental ¼ section within a ½ mile radius of the proposed oil and gas well(s)."

400627132 NCLP AA06-67-1AHNA- (NCLP AA06-69HNC PAD) Attached is the documentation of access letters sent.

Thanks,

Asher Weinberg
